V. Explanation

Park 596 is located in the Brighton Park community area on the southwest side of the City, about six miles from the downtown area. Brighton Park is in the top five community areas with an open space need based on the per capita methodology. As a 17-acre site, this park development is a rare and exciting opportunity for this community.

The Park District seeks to create an engaging, attractive, safe and accessible new administration headquarters building, a new fieldhouse, and outdoor recreational facilities at Park 596. The new, multi-story Administration Headquarters building will be approximately 56,000 square feet and will include related site improvements such as parking, walkways, and site lighting. A new fieldhouse building of approximately 19,000 square feet will support indoor recreation amenities. The remainder of the site will be development for outdoor recreation facilities including up to three artificial turf athletic fields or diamonds, natural turf athletic fields or diamonds, athletic field lighting, walkways, a playground, and a spray pool.

The Park District plans to publically bid the project for construction. This requires the Park District to engage a design firm to produce 100% Construction Documents and perform construction administration. John Ronan Architects is currently under a separate contract to prepare drawings through design development for the development of Park 596.
