V. Explanation

In 2014, Northwestern purchased the entire Time-Life Building at 541 North Fairbanks including the Park District’s five floors. CPD leased back the full five floors with the intention of seeking out a new administration headquarters and as a part of the lease deal reduced our footprint by two floors. Today, the Park District occupies 3 full floors (65,210 square feet) which remains home to the Board and administrative staff. The Park District’s current lease is set to expire in 2022 with no further options to extend the lease.

The search for a new administrative headquarters for the Park District was undertaken with 20 locations considered in the Loop as well as neighborhoods across the city. Four finalist sites were identified in the Loop, Brighton Park, the Near West Side and Humboldt Park. The Brighton Park site at 48th and Western was selected due to its potential value to both the community and the Park District.

The large acreage of the 48th and Western site makes it possible to provide significant indoor & outdoor recreation opportunities for people of all ages and abilities, in an area of the City underserved by public park space. The construction of the new headquarters, fieldhouse, and park is a transformative investment which will be a source of civic pride for the Brighton Park neighborhood. The building will be a recognizable landmark along Western Ave Blvd as well as the CTA Orange Line. With direct proximity to James Shields Middle School and close proximity to a number of other neighborhood schools, the new park development allows for sharing of recreation resources between agencies.

This project consists of three inter-related components: a new headquarters building conjoined with a field house in a neighborhood park with outdoor amenities. Like more historical Chicago fieldhouses, the headquarters building and field house is set into the park to give the building a dignified presence befitting an important civic structure, and to organize the park space around it: grass and artificial turf playing fields in a large central area to the west surrounded by a more naturalistic landscape treatment which expands to the east of the new building and provides the building's foreground. A playground and spray pool is located near the neighborhood entrance to the park on the north side of the property; parking is located along the Metra track embankment on the south side of the site and accessed from Western Avenue. The building concept is designed to make Park District staff feel like they are working in a park.
