This contract was publicly advertised as an Invitation for Bids (“IFB”). One (1) bid was received on the due date and time, and were was publicly opened and read aloud. The bid was found by the Department of Purchasing (“Purchasing”) to be compliant and responsive.

The Code of the Chicago Park District, Chapter XI, Section D, 1, b, (12) states that the conditions for an award to be made to a single responsible and responsive bidder are that the price submitted is fair and reasonable; and (i) other prospective bidders had a reasonable opportunity to respond to the bid; (ii) there is an inadequate amount of time for re-bid; or (iii) the equipment is available only from one source. The Department of Facility Management reviewed the bid received and determined that the unit price per gallon and the extended price are fair and reasonable. Additionally, this IFB was advertised for 17 calendar days, no requests for an extension of the bid due date were received.

Accordingly, based on the results of the bid review, it has been determined that the lowest responsive and responsible bidder is Univar USA.

V. Explanation

The Chicago Park District (“CPD”) has over 100 outdoor pools, indoor pools, and interactive spray pools district wide, and all of these pools require Sodium Hypochlorite to keep the water safe and clean. Further, the CPD purchases annually approximately 250,000 gallons of Sodium Hypochlorite and the delivery of it may vary by location: at some facilities, the awardee’s delivery truck can drive next to the facility and at other facilities, the awardee’s delivery truck must park curbside and a hose must be used to deliver the Sodium Hypochlorite from the truck and to the containers/drums in the facility.

Univar USA has previous experience in supplying and delivering Sodium Hypochlorite to the Chicago Park District and has the capacity necessary to perform efficiently and in a timely manner.

Therefore, it is in the best interest of the Chicago Park District to award Univar USA the contract for the Supply and Delivery of Sodium Hypochlorite.
