The Department of Facilities Management is responsible for maintenance, repair and support of Chicago Park District facility buildings, with (66) buildings having a Building Automation System (BAS). The BAS system allows park district engineers the ability to monitor, service and maintain buildings while physically servicing other facility locations. This also assists in the reduction of energy expenses by regulating temperatures for programming and patron comfort. Having this contract in place will allow Facilities to expeditiously meet its operational needs at a fair and reasonable price. Therefore, it is in the best interest of the Chicago Park District to award Anchor Mechanical, Inc. the contract for the maintenance, repair and support of the Building Automation System.
