The Scope of Services for this project included the development of a new 2,485 sq.ft. boat house facility. The building consists of a 1

story three season building. A portion of the facility includes a kayak and canoe enclosed storage area with ornamental fencing. The balance of the facility consists of public restrooms and office. The exterior plaza space includes a metal canopy with lighting and pavers to take you to the river's edge. At the river, a new fully accessible floating dock system has been installed. Additionally, the site area received landscape improvements including trees, native plantings, stone outcroppings and sod.
